This is a profile of Chalvey Ward. It is intended to accompany the wider Joint Strategic Needs Assessment of Slough. Profiles have been created for each of the Electoral Wards within Slough.

The profiles are split into nine topics with these being accompanied by a summary of key findings and supported by metadata (information about the data used within the profiles).

The profiles are a tool which will be regularly developed with both improved functionality and also new and refreshed indicator data. We welcome your comments and suggestions so that we can ensure future developments are relevant and useful to you.

The profiles are in the main based only on data that are collected nationally with a high degree of completeness. This has been supplemented with local data where this has been considered appropriate.

Some indicators may give small numbers at Ward level. This should be taken into consideration when interpreting the data. Small changes in counts can lead to wide variance in the rate, and counts can vary significantly from year to year.

Any provisional conclusions drawn from the profiles should be compared with other sources of information, both quantitative and qualitative.

1. SUMMARY

- There are 12,521 people living in Chalvey 27.6% of these are children aged 0 to 15 and 7.4% are older people aged 65 and over. In Chalvey, the total population whose ethnicity is not classed as 'White UK' is 10270. This equates to 83.1% of people. For Slough, this is 64.7% of the population.
- Out of the 15 wards in Slough, Chalvey is the second most deprived ward. 20.9% of children in Chalvey are at risk of living in poverty, compared with 19.3% across Slough.
- According to the ONS figures from September 2017, there were 115 people in Chalvey claiming Job Seekers allowance. This equates to 1.4% of the population of Chalvey. The total claiming job seekers allowance in Slough was 1.35% of the population. The percentage of people living in income deprived households, reliant on means tested benefit, in Chalvey is 18.9% of the wards population. The average in Slough is 15.3%.
- Of the children who are resident in Slough in 2016/17, 61.6% were reaching the expected standard in Reading, Writing and Maths at Key Stage 2. Within Chalvey the proportion was 57.3% of children. For children resident in Slough the attainment 8 score, for 2016/17, is 61.6% and England is 61.1%. The attainment 8 score for Chalvey is 46.5% for 2016/17.
- The average life expectancy at birth for males living in Chalvey is 76.1 years. The average life expectancy at birth for females in Chalvey is 79.7 years. Death rates from all causes in people aged less than 75 are higher than expected. Emergency hospital admissions for all causes are higher than expected*.
- An estimated 22.8% of adults in Chalvey are obese. An estimated 10.9% of adults in Chalvey binge drink. An estimated 28.1% of adults in Chalvey eat healthily.
- The most common council tax band in which housing in Slough falls is Band C. This accounts for 42.7% of all dwellings. The most common council tax band in which housing in Chalvey falls is Band C. This accounts for 54.1% of all dwellings.
- Chalvey has an area of 2.4 square kilometers which represents 7.51% of the total area of Slough. An average of 5,261 people living in each square kilometer of Chalvey. This is more than the average living in each square kilometer of Slough.
- The most common land use in Slough is Built on (roads, buildings etc.), followed by Farmland (fields, orchards etc.), then Green Urban (parks, gardens, golf courses, sports pitches etc.). There is no Natural land (moors, heathland, natural grassland etc.) within Slough.

** Given the age and gender structure of the population and national death/admission rates*

1. SUMMARY

Category	Indicator	Chalvey	Slough Average	Ward Range Worst	Local Authority Average Worst ← --- Best →	Ward Range Best
Deprivation & access	Indices of Multiple Deprivation Score - IMD (2015)	29.0	22.9	32.9		13.6
	% children in Poverty (2015)	20.9	19.5	25.7		9.8
	Barriers to Housing and Services Score - IMD domain (2015)	30.8	41.1	58.3		17.7
Economy & Enterprise	% Job Seekers Allowance Claimants (September 2017)	1.4	1.4	1.8		0.9
	% Income deprived households (2015)	18.9	15.1	8.5		21.3
Education	% of Good Level of Development at Age 5 (2013/14)	56.9	57.8	46.2		67.0
	% 5+ GCSEs A*-C (inc Maths and English) (2013/14)	56.3	59.2	48.3		72.1
Health	All Cause Mortality Rate <75, DSR per 100,000 (2012-16)	1308.1	1016.8	1354		728
	Life Expectancy - males (2011-15)	76.1	78	75.2		82.2
	Life Expectancy - females (2011-15)	79.7	82.9	79.6		87.2
	Emergency hospital admissions for all causes (SAR) 2011-16	134.3	125.0	151.9		104.6
	% low Birthweights <2500g (2011-15)	3.2	3.3	4.6		2.1

How to read the spine chart:

The shapes on the graph represent the value of the ward compared against the Local Authority average. If positioned to the right of the average line this suggests the ward is performing 'better' in a particular indicator, to the left suggests it is 'worse'. This does not necessarily mean higher or lower values, e.g. high GCSE attainment is 'better', whereas a high crime rate is 'worse'. The light grey rectangle represents the range between the 'best' and 'worst' wards in the local authority. The yellow circles represent values that are within the 75th and 25th percentile for that indicator, or where most values typically lie. The black triangles represent values that are better than the average, whilst the blue diamond shows values that are worse.

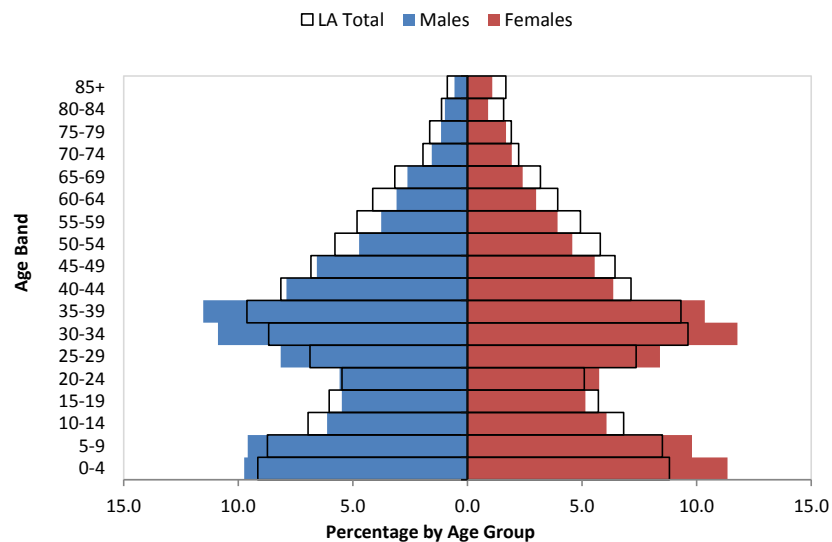

2. DEMOGRAPHICS

Population Summary 2016

- Chalvey has a population of 12,521 people. This figure has decreased at a slower rate than it has on average across Slough since 2015.
- The working age population is relatively large in comparison to Slough.
- Related to this, the ward has a proportionately larger young population (28%) and a smaller older population (7%).
- The 2015 Local health data indicates that 67% of Chalvey are BME, higher than the Slough average.
- In Chalvey, the total population whose ethnicity is not classed as 'White UK' is 10270. This equates to 83.1% of people. For Slough, this is 64.7% of the population.

	Chalvey	Slough
Total Population	12,521	-
Males	6,499	51.9%
Females	6,022	48.1%
Children (0-15)	3,452	27.6%
Working Age (16-64)	8,141	65.0%
Older People (65+)	928	7.4%
BME** Population (2015 Local Health)	8,368	66.8%
Population (2015)	12,638	-
Population Change (2015-2016)	-117	-0.9%

Population structure 2016

Religion 2011

Religion	Slough
Christian	41.2%
Buddhist	0.5%
Hindu	6.2%
Jewish	0.1%
Muslim	23.3%
Sikh	10.6%
Any other religion	0.3%
No Religion	12.1%
Religion not stated	5.7%

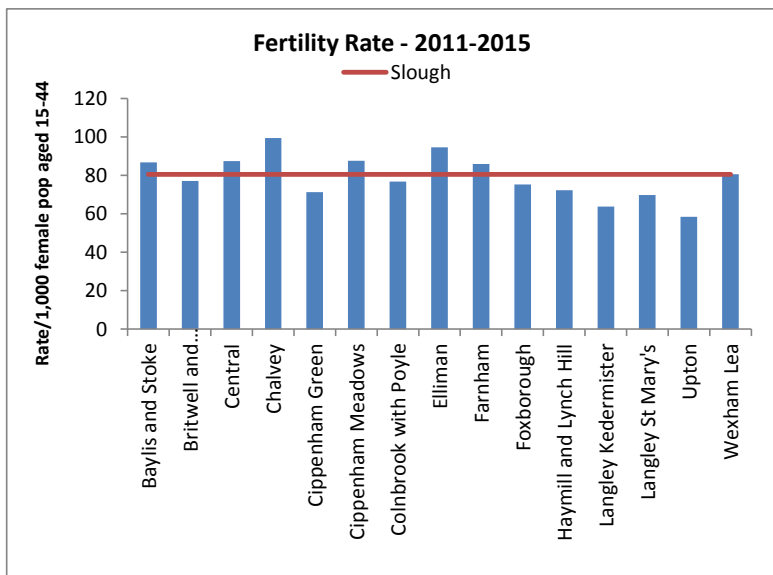

** Black and Minority Ethnic population (the population whose ethnicity is not any category of 'White')

2. DEMOGRAPHICS

Fertility Rate

Understanding the demography of an area will help with planning of appropriate services. The fertility rate is the ratio of live births in an area to the population of that area; expressed per 1000 population per year.

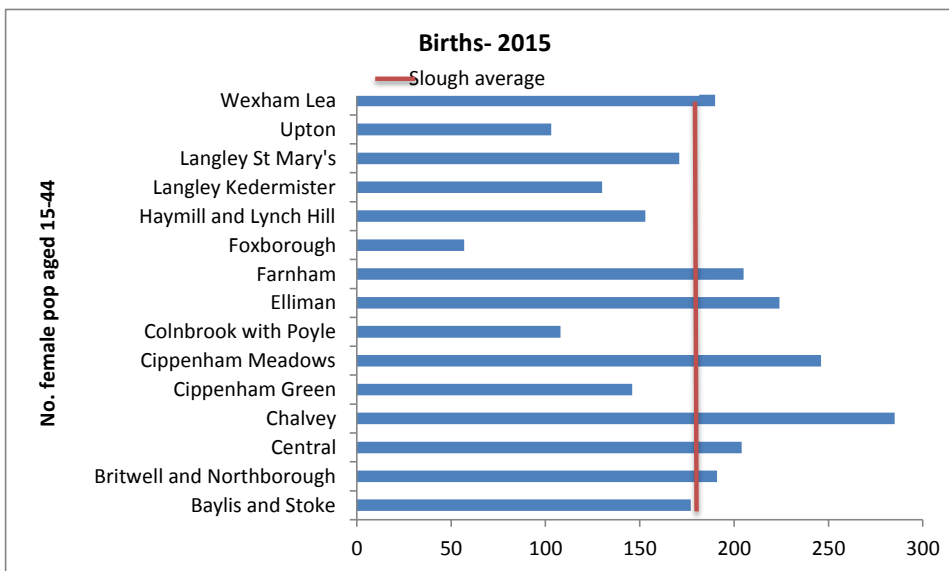

- The fertility rate, per 1,000 female population aged 15-44, in Slough is 80.4, which is significantly higher than the national rate of 63.2.
- The fertility rate in Chalvey is 99.4 per 1,000 female population aged 15-44, this is more than the Slough rate.

New Births

Local authorities are key users of birth statistics. Data are used, for example, to plan maternity services, inform policy decisions and monitor child mortality.

- There were 2,590 live births in Slough in 2015.
- 285 of those were to mothers who reside in Chalvey.
- 52% were boys and 48% were girls.
- 64% were born within a marriage/civil partnership and 36% were born outside a marriage/civil partnership.
- 99% were born in an NHS hospital.
- The average age of mother at birth of child was 30.
- 26% of births were to mothers born in the UK.

3. DEPRIVATION, POVERTY AND ACCESS TO SERVICES

Indices of Multiple Deprivation (IMD)

- Out of the 15 wards in Slough, Chalvey is the second most deprived ward.
- 3781 people in the ward are living in an area classed amongst the 10% most deprived in Slough, according to the latest Indices of Deprivation from 2015.
- Nationally, there aren't any people in any of the wards of Slough that are in the 10% most deprived areas when comparing them at an England level.

Child Poverty

- 20.9% of children in Chalvey are at risk of living in poverty, compared with 19.3% across Slough.
- This figure has fallen by 16% since 2006, and Slough has decreased by 5.5% since 2006.

Free school meals

- 11.7% of children living in Slough and attending schools in Slough are eligible for and receiving free school meals. Of the children living in Chalvey, 14.9% are eligible for, and receiving free school meals.

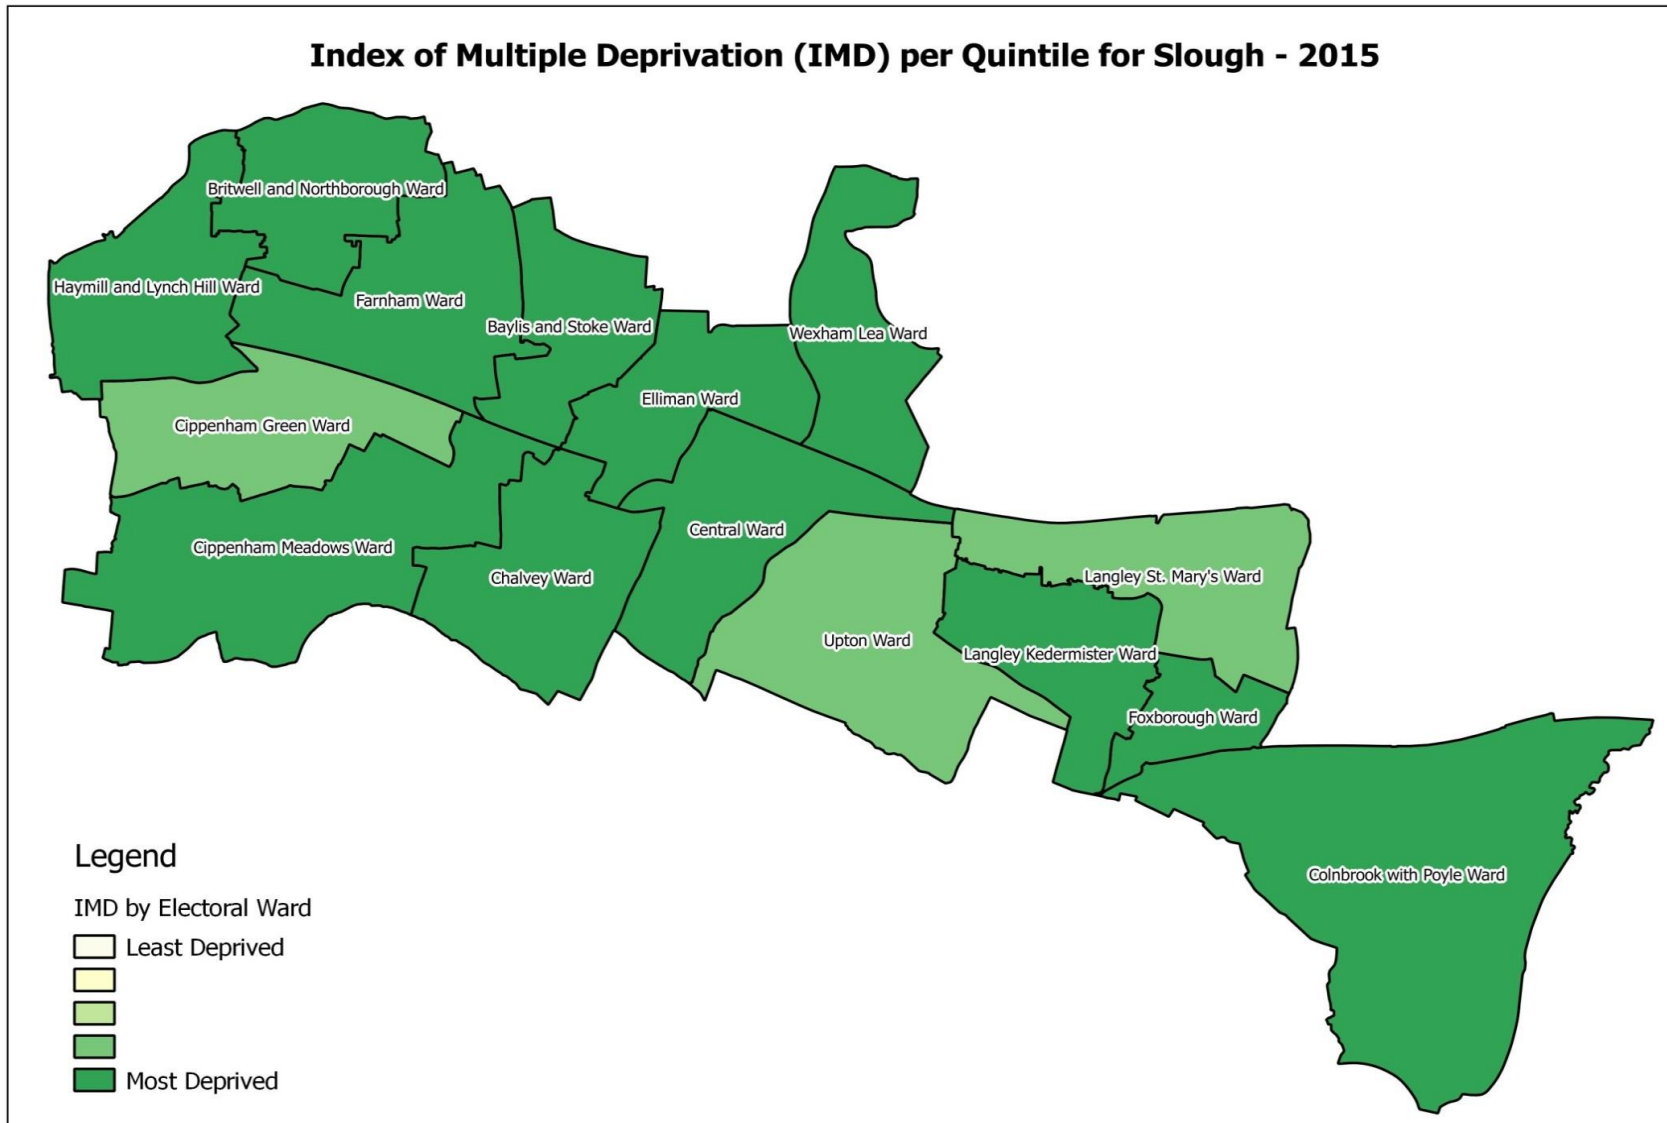

Access to Services

- The indices of multiple deprivation includes a measure of barriers to housing and services. On this measure Chalvey is the third least deprived ward in Slough (out of the 15 wards in the borough).
- 3290 people in the ward are living in an area classed amongst the 10% most deprived in Slough, against the barriers to housing and services measure.
- Nationally, 34% of people in the ward live in an area classed amongst the 10% most deprived for barriers to housing and services, according to the latest Indices of Deprivation.

Accessibility

- Chalvey is a 16 minutes walk from the centre of Slough. Local bus services are provided by First in Berkshire & The Thames Valley Buses and Green Line.
- Slough is served by First Great Western stations at Burnham, Slough and Langley. Slough station is a junction between the Great Western Main Line and the Slough to Windsor & Eton Line to allow passengers to connect for Windsor & Eton Central.
- Slough is near London, Heathrow Airport, Uxbridge, Maidenhead and Staines, making the town a travel hub. Many people from Slough work in nearby towns and cities such as Windsor, Reading, London and Bracknell, and there are large passenger movements in the morning and evening rush hours.

IMD 2015: Slough

4. ECONOMY AND ENTERPRISE

Benefit Claimants (November 2016-2017)

- According to the ONS figures from September 2017, there were 115 people in Chalvey claiming Job Seekers allowance. This equates to 1.4% of the population of Chalvey. The total claiming job seekers allowance in Slough was 1.35% of the population.

It is unknown what other benefits are claimed at a ward level for Slough as this has only been calculated for the old ward layout in Slough. Below, are the latest Slough figures however:

Statistical Group	Slough	
	Number	% of Ward Population
ESA and Incapacity Benefits	4,440	4.7%
Lone parents	970	1.0%
Carers	1,260	1.3%
Other income benefits	190	0.2%
Disabled	560	0.6%
Bereaved	200	0.2%
Total Claimants	8,520	9.0%

Income Deprivation

- The percentage of people living in income deprived households, reliant on means tested benefit, in Chalvey is 18.9% of the wards population. The average in Slough is 15.3%.

Our Community

- In Chalvey, the percentage of people that cannot speak English well or at all is 10% of people. The proficiency in English as an average for Slough is 6% of people.
- In Slough as a whole, the majority of people in employment (35% of workers) were employed in manual occupations. 16% of workers were employed in professional occupations.
- 64.1% of the population of Slough, who are aged 16 to 74 years are in employment. 5.42% of the population aged 16 to 74 are unemployed. These are unknown for the 2015 wards.

5. EDUCATION

We have to treat the following data with some caution due to the small numbers that are involved in the calculations. It is likely that differences between areas will be largely due to random effects occurring within the data. Data is only available at a Ward level for children who both live in, and attend school within, the local authority.

Pupil characteristics

- 82.4% of children resident in Slough come from non-White British backgrounds and 1.4% where information was not obtained. 94% of Children in Chalvey come from non-White backgrounds. (5% were White British).
- According to the School Census 2017, 54.8% of Children who are resident in Slough have English as a second language. Within Chalvey, there are 72.1% of children with English as a second language.

Unauthorised absences

- Unauthorised pupil absence in all schools in 2015/16 for Slough was 1.1%, which is the same as England. Split by Primary and Secondary Schools, there were 1.1% and 1.0% of unauthorised absences retrospectively.

Key Stage 2 attainment

- Of the children who are resident in Slough in 2016/17, 61.6% were reaching the expected standard in Reading, Writing and Maths at Key Stage 2. Within Chalvey the proportion was 57.3% of children.

GCSE attainment

Attainment 8 is the students' average achievement across eight subjects. For a school, the score is the average of all its students scores.

- For children resident in Slough the attainment 8 score, for 2016/17, is 61.6% and England is 61.1%. The attainment 8 score for Chalvey is 46.5% for 2016/17.

Free school meals

- 11.7% of children living in Slough and attending schools in Slough are eligible for and receiving free school meals. Of the children living in Chalvey, 14.9% are eligible for, and receiving free school meals.

Child development at age 5

- The average percentage of pupils achieving a good level of development at age 5 in Slough is 57.8%. For Chalvey, this is 56.9 % in 2013/14.

6. HEALTH

It is often difficult to use health data when looking at small areas such as Wards. This is because of the size of the numbers involved. For example, only a few people from each Ward may be admitted to hospital each year for a specific condition. When we are looking at numbers that are very small we have to consider two key points before they are used in profiles such as this. Firstly, when numbers are small we are not legally able to share them as the individual may be identifiable from the data. Secondly, it is difficult to come to any reliable conclusions from information which is based on these small numbers. It may also be the case that the information is not available at these low levels. This is particularly true of information about peoples lifestyles (for example, how many people smoke or drink alcohol). One of the ways that this is overcome is to use 'modelled' data. This is data that has been taken from a much larger number of people and used to estimate the likelihood of a certain characteristic appearing in other areas such as Wards depending on some key features of that area such as how many people of a particular age group live there.

Health Data 2011-16

- The percentage of live births to mothers living in Chalvey which were of a low birth weight is estimated to be 3.2%. The percentage on average across Slough is 3.3%. Any difference is not statistically significant.
- The number of people living in Chalvey who are diagnosed with cancer is lower than expected given the age and gender structure of the population.
- The average life expectancy at birth for males living in Chalvey is 76.1 years. The average life expectancy at birth for females in Chalvey is 79.7 years.

Deaths

Deaths from all causes, all ages	higher than expected*
Deaths from all causes, under 65	higher than expected
Deaths from all causes, under 75	higher than expected
Deaths from all cancer, all ages	as expected
Deaths from all cancer, under 75	as expected
Deaths from circulatory disease, all ages	higher than expected
Deaths from respiratory diseases, all ages	as expected

* Given the age and gender structure of the population and national death rate

Hospital admissions

Emergency hospital admissions for all causes	higher than expected*
Planned hospital admissions for all causes	lower than expected
Emergency hospital admissions for all coronary heart disease	higher than expected
Emergency hospital admissions for stroke	higher than expected
Emergency hospital admissions for heart attack	higher than expected
Emergency hospital admissions for chronic obstructive pulmonary disease	as expected

* Given the age and gender structure of the population and national admission rates

Top 5 causes of deaths

Chalvey

Please Note: This isn't broken down by ward as there is only data against the 2011 wards

Cause of death - 2015	Number
Cancer (malignant neoplasms)	23
Ischaemic heart diseases	120
Dementia and Alzheimer disease	78
Cerebrovascular diseases	65
Chronic lower respiratory diseases	52

* Figures under 5 have been suppressed

6. HEALTH

Childhood Obesity

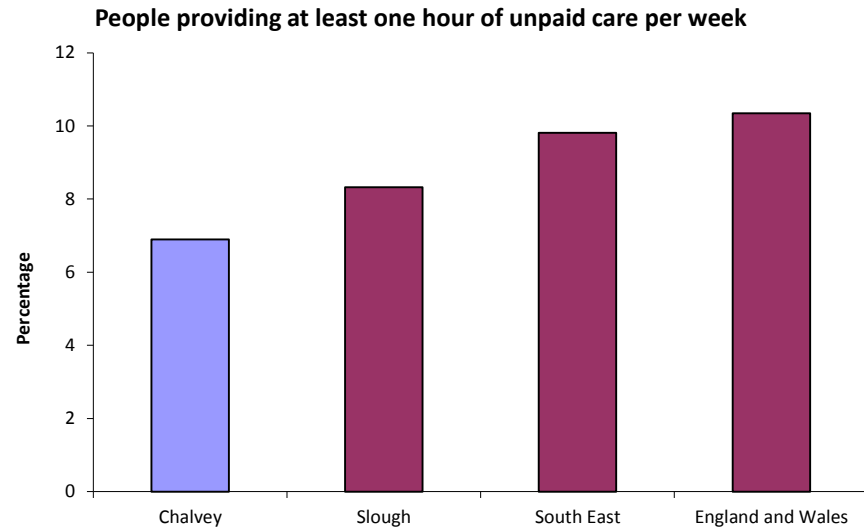

- The heights and weights of children in reception year and year 6 are measured annually as part of the National Child Measurement Programme.
- 11% of reception year children in Chalvey are obese. An average of 10.8% of reception year children in Slough are obese.
- 18.3% of year six children in Chalvey are obese. An average of 23.4% of year six children in Slough are obese.
- It is important to note that this data at Ward level involves small numbers and any differences between areas will be, in part, due to chance occurrences in the data.

Adult Lifestyles

- An estimated 22.8% of adults in Chalvey are obese.
- An estimated 10.9% of adults in Chalvey binge drink.
- An estimated 28.1% of adults in Chalvey eat healthily.

Sense of health and wellbeing

- Mapping the the 2011 Census data to the 2015 wards, an estimated 4.5% of adults in Chalvey feel that their health is bad or very bad in general. The average for Slough is 4.5%.
- The Local Health data shows 6.9% of adults in Chalvey provide 1 hour or more of unpaid care per week, with 1.6% of adults providing 50 hours or more of unpaid care per week.

6. HEALTH

Falls are the largest cause of emergency hospital admissions for older people, and significantly impact on long term outcomes, e.g. being a major precipitant of people moving from their own home to long-term nursing or residential care. The tables below show falls related admissions broken down by local authority and electoral ward.

Falls admissions by age

Age Band	2011-12	2012-13	2013-14	2014-15	2015-16
Under 20s	175	126	145	140	46
20-64	232	180	206	206	47
65-79	202	106	135	140	41
80+	378	246	242	243	65
Total	987	658	728	729	199

Falls admissions by fiscal month

Month	2011-12	2012-13	2013-14	2014-15	2015-16
Jan	84	50	60	54	70
Feb	82	68	72	63	66
Mar	76	42	57	49	63
Apr	69	45	63	59	
May	84	52	55	73	
Jun	84	70	67	74	
Jul	105	61	65	78	
Aug	82	49	66	55	
Sep	74	63	61	53	
Oct	90	50	44	65	
Nov	78	51	50	49	
Dec	79	57	68	57	
Total	987	658	728	729	199

Yearly Practice Falls Admissions by ward

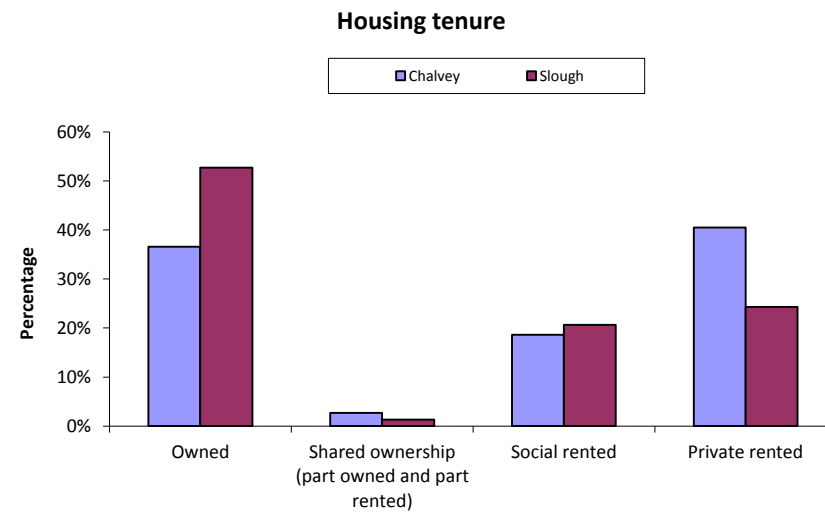

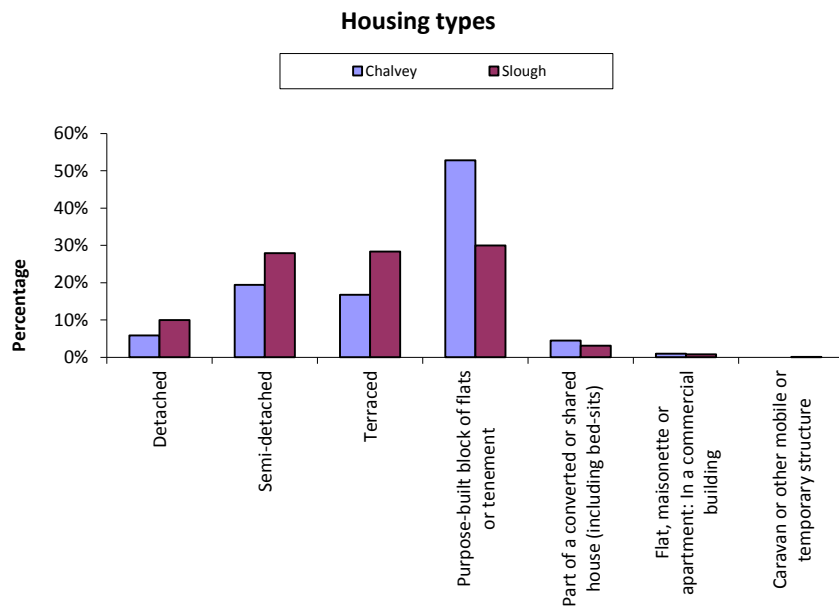

Ward Name	2011-12	2012-13	2013-14	2014-15
Chalvey	36	50	71	55

- The highest risk of falls is in those aged 65 and above and it is estimated that about 30% people (2.5 million) aged 65 and above living at home and about 50% of people aged 80 and above living at home or in residential care will experience an episode of fall at least once a year.
- Falls that results in injury can be very serious - approximately 1 in 20 older people living in the community experience a fracture or need hospitalisation after a fall. Falls and fractures in those aged 65 and above account for over 4 million bed days per year in England alone, at an estimated cost of £2 billion.

7. HOUSING

- The most common council tax band in which housing in Slough falls is Band C. This accounts for 42.7% of all dwellings. The most common council tax band in which housing in Chalvey falls is Band C. This accounts for 54.1% of all dwellings.
- The percentage of households that are overcrowded (have 1 or more rooms too few) in Chalvey is 33.5%. The average across Slough is 20.8%.

- According to the latest Local Health data using 2016 wards and 2011 Census data, the percentage of people aged 65 and over living alone in Chalvey is 24.7%. This is smaller than the average for Slough (31.9%).
- A household is said to be in fuel poverty if it needs to spend more than 10% of its income on fuel to maintain a satisfactory heating regime. In Chalvey, the percentage of households that experience fuel poverty is 9.9%. This is larger than Slough's average (8.3%).

8. ENVIRONMENT

Area

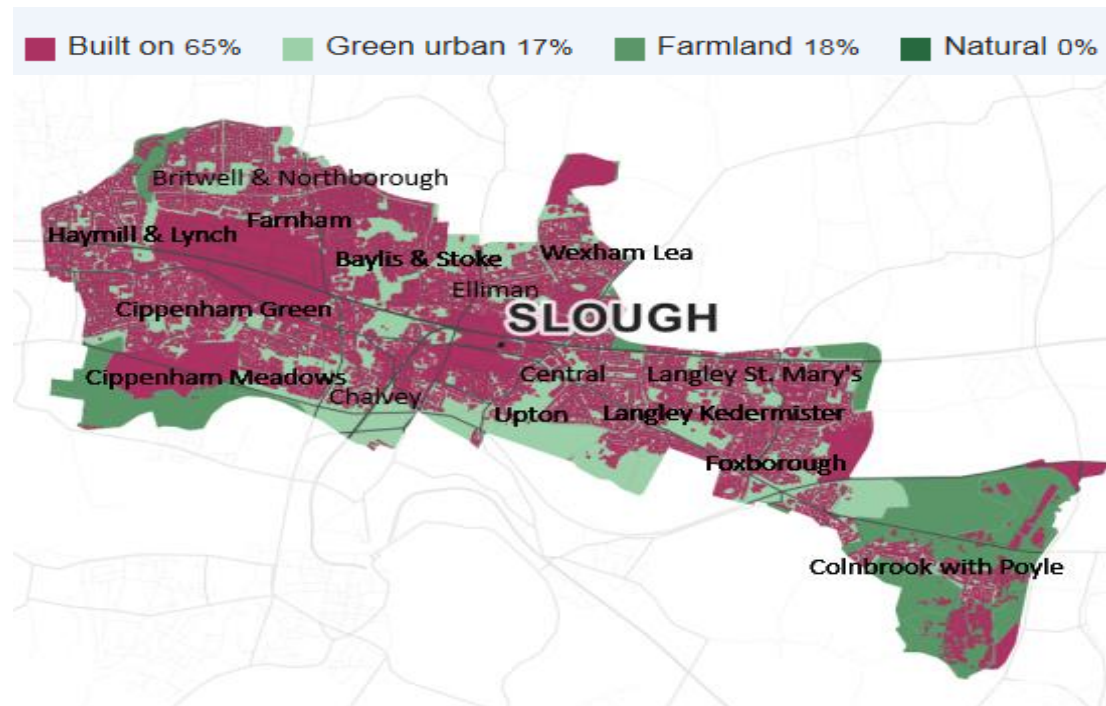

- Chalvey has an area of 2.4 square kilometers which represents 7.51% of the total area of Slough.

Population Density

- Population density describes the average number of people living in each hectare of land in an area.
- An average of 5,261 people living in each square kilometer of Chalvey. This is more than the average living in each square kilometer of Slough.

Land Use

- The most common land use in Slough is Built on (roads, buildings etc.), followed by Farmland (fields, orchards etc.), then Green Urban (parks, gardens, golf courses, sports pitches etc.). There is no Natural land (moors, heathland, natural grassland etc.) within Slough.

9. SOURCES OF DATA

Item	Source	Date	Description
1. Summary Indicators			
Indices of Multiple Deprivation - IMD (2015)	Department for Communities and Local Government (DCLG)	2015	A national index of deprivation, where 32,480 Lower Super Output Areas are ranked in order of relative deprivation
% children in Poverty (2015)	Department for Work and Pensions (DWP)	2016	Measures the % of children in households receiving Child Tax Credits and with incomes 60% or less of the median
Barriers to Housing and Services - IMD domain (2015)	DCLG	2015	A national index of deprivation, where 32,480 Lower Super Output Areas are ranked in order of relative deprivation
% JSA Claimants (September 2017)	NOMIS	2017	DWP benefits data published by NOMIS
% Income Deprivation	Public Health England	2016	Local Health Data - People living in income deprived households as a percentage of the population
Child Development at age 5	Public Health England	2016	Local Health Data - Percentage of pupils achieving a good level of development at age 5
% 5+ GCSEs A*-C (inc Maths and English) (2016)	Public Health England	2016	Local Health Data - % of pupils achieving 5 or more GCSEs at grade A*-C including English and Maths
All Cause Mortality <75 (2012-16)	Public Health England	2016	Age/sex standardised mortality rates
Life Expectancy - males (2011-15)	Public Health England	2017	Life expectancy at birth calculated from all cause, all age mortality
Life Expectancy - females (2011-15)	Public Health England	2017	Life expectancy at birth calculated from all cause, all age mortality
Emergency hospital admissions for all causes (2011/12-2015/16)	Public Health England	2017	Age/sex standardised hospital admission rates
% low Birthweights <2500g (2011-15)	Public Health England	2017	Percentage of live births with weight <2,500g
2. Demographics			
Population size	Office for National Statistics (ONS)	2017	Mid-2016 Population Estimates for 2015 Wards in England and Wales
Religion	ONS	2011	Religion or belief of usual resident population on Census day 2011
Fertility Rate (2011-2015)	PHE/ONS	2017	Crude fertility rate: live births per 1,000 women aged 15-44 years, 2011-2015
Live Births (2015)	NHS Digital	2016	The annual extract of births data for 2015.
3. Deprivation			
Indices of Multiple Deprivation	DCLG	2015	A national index of deprivation, where 32,480 Lower Super Output Areas are ranked in order of relative deprivation. The Indices of Deprivation 2010 is not a measure of affluence; all of the indicators used in the index are designed to identify aspects of deprivation, not affluence. Therefore the area ranked as the least deprived is not necessarily the most affluent.
